

BURROW TOP QUILT

SIZING GUIDE

■ HOW TO MEASURE

HEIGHT

From the top of your head to the bottom of your feet.

WIDTH

Measure around the widest part of your body, including your arms. Keep your arms loose at your sides, in your usual sleeping position.

■ FIT & SLEEPING

Add **4-5 in (10-13 cm)** to your width if you'll use it on the ground or sleep actively.

If you sleep cold, consider ordering **10° lower** than you intend to primarily use the quilt.

Supplement head insulation as needed with a down hood or other covering.

■ DESIGN NOTES

The Burrow covers you from the neck down, with a tapered cut below the torso for mobility while reducing weight and volume.

The footbox can be sewn closed, or opened with a zipper to lay flat for added ventilation.

SIZE CHART

Measurement	Short	Standard	Long
Fits height	5'2"–5'7" 157–170 cm	5'7"–6'2" 170–188 cm	6'2"–6'7" 188–201 cm
