

HEARTH

UNDER QUILT

SIZING GUIDE

■ HOW TO MEASURE

HEIGHT

From the top of your head to the bottom of your feet.

WIDTH

Measure across the widest point of your backside. Covers up to **40 in (102 cm)** — add the +5" baffle or use a top quilt for side gaps.

■ FIT & SLEEPING

If you tend to sleep cold, consider ordering **10° lower** than you intend to primarily use the quilt.

In-between sizes are recommended to **size down**.

■ DESIGN NOTES

A full-length underquilt for gathered-end and bridge hammocks, with an untapered rectangular cut for simple, cold-spot-free coverage.

Adjustable suspension — a full-length shock cord plus secondary lines — lets you tune loft to your hammock.

SIZE CHART

Measurement	Short	Standard	Long
Fits height	5'2"–5'7" 157–170 cm	5'7"–6'2" 170–188 cm	6'2"–6'7" 188–201 cm
